Lebron "King" James

By Jacob S.

Do you like famous basketball stars? If you do this is the right article for you.

LeBron James was born five days after Christmas, in 1984, to 16-year-old Gloria James. When LeBron was three years old he got a child sized basketball hoop for his birthday. His mom raised the hoop as high as it would go, and instead of running up to do a layup he dunked it instead!

When he was in elementary school he moved to twelve different houses and twelve different schools in twelve months! How would you feel having to make new friends every month?

James was selected first overall in the 2003 NBA draft by the Cleveland Cavaliers. During LeBron's first professional game he scored 25 points and during a game deep in the season he recorded a season-high 41 points, becoming the youngest ever to score 40 or more points in one game.

LeBron has been playing in the NBA for thirteen years. His first seven seasons he played for the Cleveland Cavaliers, for his next four seasons he played for the Miami Heat and won two NBA Championships! At the end of the last season his contract was up and he decided to return to the Cavaliers.

Mrs. Frisby and the Rats of NIMH

By: Madison B.

If you have some free time and you don't want to waste it, start a great book, *Mrs. Frisby and the Rats of NIMH*. Some of the most important characters are; Mrs. Frisby, Timothy Frisby, Cynthia Frisby, Martin Frisby, and Teresa Frisby. Here's a "book trailer" for you; One of Mrs. Frisby's children, Timothy, falls ill and she needs to do what she can to save him. She learns new things, meets new animals, and goes on a crazy adventure!

I recommend this book highly. I recommend it because it's kid-friendly and animal-friendly. I suggest this book to people who like books that are full of adventure. If you like this book, you may want to read other books in the series. The books and their authors are; *Raccoon and the Rats of NIMH* by Jane Leslie Conley, *Robert's daughter and R-T, Margaret, and the Rat of NIMH* by Jane Leslie Conley and Leonard B. Lubin, the illustrator. If you read this book I hope you enjoy it as much as I do! Why wouldn't you?

Siamese Cats

By: Joey R.

If you are looking for a cat read this article about the Siamese cat! The Siamese cat became one of the most popular breeds in Europe and North America. The Siamese cat has blue diamond shaped eyes, and a triangular shaped head. They also have large ears, a slender muscular body,

and a variation of fur color (mostly white with a little bit of black). Siamese often play the game of fetch. They enjoy company from other cats. Siamese cats seek human interaction and are playful into adulthood. They are social, intelligent and very playful. They are also gentle with little kids. The Siamese cat is one of the oldest breeds of cats. They live up to 15 years old and

they rarely shed. If you are looking for a friendly, smart, and playful cat? Please think about the SIAMESE CAT!

James Rodriguez

By: Ryan M.

James Rodriguez, is a Colombian soccer player for Spanish League champions, Real Madrid Club de Fútbol and the Colombian National Team. His career started when Envido of Argentina picked him. Soon, he was turned over to Banfield (Argentina). He went to Porto (Portugal) on July 6, 2010. On May 24, 2013, James was traded over to AS Monaco for 45 million Euros! He was a big hit. James finally scored his first goal for the team off a free kick shot against Rennes FC. Rodriguez again scored in the next game against Nice (Nee-se) in the 4th minute. After a game in the 2014 World Cup Brazil, he stated it was his life's dream to play for Real Madrid CF. With the huge tournament ending, James signed a contract with Madrid on July 22, 2014 for " 80 million. This was the 4th most expensive trade in history of FIFA. It was Real Madrid's 3rd most expensive transfer.

On June 2, 2014, news came that James made the twenty-three man squad for the World Cup. On June 28, against the Uruguayans, he scored one of the best World Cup goals in history. He opened the scoring by volleying a left-footed shot off his chest. Uruguay's head coach, Oscar Tabarez, praised him and said he was the best player of the 2014 World Cup. At the end of the tournament, Colombia got knocked out of the Quarter Finals by powerhouse, Brazil. Brazil, without Neymar and Thiago Silva the next match, suffered a poor 7-1 defeat against Germany. The Germans went on to win the trophy.

James is married to Daniela Ospina. She is the sister of David Ospina, James' goalkeeper teammate.

Even though James Rodriguez might not be the best soccer player, he definitely is a great one.

Bethany Hamilton

By Eva S.

Bethany Hamilton is a surfer who got attacked by a shark when she was thirteen years old on Halloween 2003. Her full name is Bethany Meilani Hamilton. She was born on Feb 8, 1990. Her parents basically put her on a board before she could walk. She's a pro surfer now and surfs every day. Her parents are Thomas and Cheryl Hamilton. Her brothers are Noah who is 8 years older than Bethany and Timothy who's 4 years older. Bethany got married on Sunday, August 18th, 2013 to Adam Dirks. Bethany is pregnant with a baby. Her best friend is Alana Blanchard and she was with her at the shark attack. She's known her forever and they still are best friends. She is also on a show called the Amazing Race, Kid's Choice Awards, and a movie called Dolphin tail 2 Look for more about Bethany Hamilton on Bethany's blog!!!

Cats

By Abigail S.

Cats can get really cute. Dogs hate cats. Cats take tongue baths because they hate water. Sometimes they love to catch mice, birds, and rodents. Some cats don't have fur. Some cats can scratch you and bite you. When cats put up their tails it means they are happy. When cats tails are down it means they are sad. When cats are hungry they meow and follow you. I know about the Siamese cat. The Siamese cat can just be black grey and white, my cat is just white. Cats don't just go to the bathroom like dogs; they look for their litter box. Cats dig a little hole then go bathroom in the hole. Cats sleep by curling into a fluff ball and they sometimes lay on their stomach and sometimes lie like people. Cats can be farm animal. Sometimes they live on farms to scare away mice.

Cats have more muscles than us. Cats are faster, more easy to play with, and smaller than us. Cats have longer tails than dogs. Cats use their tails to balance. Although, some cats don't have any tails. Cats eat fish and drink milk. Sometimes cats chase their own tails. Cats can be black, white, orange, grey, and brown. Cats LOVE to be rubbed on the chin. They do not like to be rubbed on their belly; they will scratch you or bite you. That's almost all I know about cats!!!!!!!!!!!!

Deforestation

By: Kate Q. and Kacey C.

Deforestation is when forests are cut down or cleared. If the rainforest was 8 slices of pizza only 1 slice of the forests are left. Deforestation also means animals such as bears, lions, monkeys and many other animals lose their home. Many plants lose their homes, to be specific, more than 3 billion to 6 billion trees are cut down each year. Deforestation is a forever lasting damage to plants and animals habitats. The highest deforestations are in Philippines, Ghana, Nepal, North Korea, Indonesia, Benin, Ecuador and Honduras. Trees are being cut down using axes, fire, chainsaws and using machinery. The people cutting down the trees are using them as fuel or land for pastures and farmland. Deforestation has a bad impact.. You can help stop deforestation by going green.

Tiger

By: Nakul R.

ROAR!!! The tiger is the biggest cat in the world. Its scientific name is Panthera Tigris. Tigers have orange skin with black stripes. They can grow up to 11.5 feet long and 675 pounds in the wild! Tigers are not picky eaters; their prey varies from termites to baby elephants! Unlike other cats tigers love water. Tigers once ranged across Asia from Turkey to Russia. But now, about 100 years later, they have lost 93% of their historic range. Today they range from the Siberian tundra to grasslands to tropical swamps. Usually where tigers live there are trees, bushes and clumps of tall grass. They shade tigers from the harsh sun. The six remaining tiger species which are the Bengal tiger, the Indochinese tiger, the Malayan tiger, the Siberian tiger, the South Chinese tiger, and the Sumatran tiger have all been classified as endangered species. Tigers are amazing animals that need help. Now that you know some facts about the tiger you can help save these fascinating creatures.

The Big Bang By Zachary R.

The Big Bang happened 13.7million years ago. Before time there was one very big ball of energy and it was the only thing ever and then it exploded. About 1 million years after that time the heat died down to 3000 degrees Kelvin. Then the universe formed. It was amazing how the universe formed because it was so big and it was actually a thing and before that it was basically nothing. I hope you like the story of the Big Bang.

The Solar System By Tyler S.

Did you know the sun is 93 million miles away from the Earth or 145 million kilometers from the Earth? The moon is only 239 thousand miles away from the earth. Mercury and Venus don't have moons or a moon. Did you know the sun is about 1,495,978,707 kilometers away from the moon? There are so many amazing facts about our solar system. Read a book or explore the Internet for more information, you will be amazed.

Giant's Causeway By Kylie K.

The Giant's Causeway is interlocking rocks from volcanic eruptions. The Giant's Causeway was created about 50,000,000 to 60,000,000 years ago. It's located in Northern Ireland in a county called Antrim. Legend says that a giant named Fionn MacCumhail (or Finn MacCool) created the Giant's Causeway as a walking path. Most of the columns have six sides. Also there's a gift shop there you might want to see. So now you know a little about the Giant's Causeway. And you may want to see it one day.

City of Ember By Ava K.

Do you like books with adventure? Excitement? Drama? Awesome plot twists? Then read the book, *The City of Ember*!

In an underground city called Ember, the light doesn't come from the sun. The lights are hung all over Ember, but they are slowly dying. Lina Mayfleet and Doon Harrow are two teens in this city. When assignment day comes around, the students at the school have to pick a job from a bag. Lina picks the job that Doon wants, and Doon picks the job that Lina wants. Doon asks Lina to trade jobs so he could try and fix the generator, the machine that keeps the lights working in Ember.

A blackout soon occurs and it was a long one. Doon decides that there is no way to fix the generator and Lina stumbles upon a way to escape Ember. But her little sister, Poppy, chewed up some of the words! Lina and Doon try to find out what the words mean and go on a quest to find the escape to Ember. Will they escape? What about the other members of

Ember?

I think the book is great because

1. It was full of adventure and excitement.
2. The author did a great job adding mystery.
3. There was a good balance between tragedy and no tragedy. There are actually three other books in the series, *The People of Sparks*, *The Prophet of Yonwood*, and *The Diamond of Darkhold*. All of these are great books, but I suggest reading the first book first or the other books may be confusing. The first book of the series was published in 2003. A movie of the first book was released in 2009. I suggest this book for other kids because it has a great plot and if you need a good story, this is a great suggestion!

The Iditarod By: Chelsea S. and Disha M.

Have you ever heard about the Iditarod? If no this will tell you more about the Iditarod! They had a dog sled relay they called it the...Iditarod! Balto was in the relay, he is one of the famous dogs. Here is his tale longer than an elephant's trunk!

The Iditarod happened because a town in Nome Alaska had a sickness named diphtheria. The doctors did not have the medicine they needed.

So they needed to get the medicine so he told people that they needed the dog sled team to get the medicine. When they announced it a man named Gunner decided to be in it. His team's lead dog was Balto. When the relay reached Gunner, he quickly put the package on the sled and set off with his team! While they were crossing ice the sled tipped over and the package was GONE! But luckily Gunner found it and put it back on the sled. Gunner and his team were almost there but there was a blizzard. So Gunner didn't know if they were on the right track. But later they saw a town it was Point Safety (their stop)! They didn't know if anybody was in there because the lights were out but they kept going. Later they reached the town in Nome, Alaska. The doctor saw that he and his team were here! The doctor congratulated them for being there five and a half days early. Gunner said it wasn't me it was Balto! Since the Iditarod was so important, people decided to have a race on March 7th every year. Later Balto sadly died on March 14th 1933.

Silverwing By Dylan B.

Do you love fantasy? Then read the book *Silverwing* by Kenneth Oppel. This book is about Shade, a young runty Silverwing bat, who is blown out to sea during migration. He soon meets Marina, a banded Brightwing bat who was banished from her colony. Together the companions try to reach Shade's family, going on fabulous adventures in the

process. These adventures range from getting captured by rats to seeing bats turn into humans and much, much more. On the way Shade and Marina meet Goth and Throbb, two cannibal bats who plan to eat them, leaving them fighting for survival. Will they make it to Shade's home? Or get eaten by Goth and Throbb before they get home? Read to find out! I loved the book because it was exciting, suspenseful, and always left me guessing. I'd definitely recommend this book to anyone who didn't know what to read or didn't

have anything to do. This book is an absolute FIVE STARS!

Dolphins

By: Allison M. and Kylie K.

Do you want to learn about dolphins? Well, read this!

Dolphins are very intelligent, and they love to be around humans.

Dolphins are meat eaters. That means they eat meat such as fish. Did you know that Orcas are a type of dolphin? Well now you know! The bottle nose dolphin is the most common type of dolphin. Female dolphins are called cows, young dolphins are called calves, and male dolphins are called bulls. Dolphins live in schools of 12. Dolphins have great hearing and eyesight. Dolphins communicate by clicking whistling and much more.

Dolphins use echolocation to find their way. Dolphins have blowholes on top of their heads to breath. Thanks for reading this information.

To see more facts go to <http://www.iggyazalea.com/>

Bored? Visit Norway!

By: Morgan A. and Anabelle A.

Have you ever thought about planning a family vacation to Norway? You might want to after reading this article. Norway is a beautiful place with many, *many features that we bet you have never seen before. Norway has charming land and attractions for everyone. Read on to learn exactly why this country is so amazing.*

Along with the cool present day events, Norway's history is also fascinating. You have probably heard of the Vikings, right? The Vikings originated in Norway! The Vikings were technically pirates who were not only warriors, but skilled craftsmen, traders, and administrators. They often told sagas, long and dramatic stories. Vikings were experts in water transportation. One type of boat that Vikings often used was the longboat. Longboats were designed to be lightweight and built for speed. They can even change direction without turning! The Vikings were incredibly cunning and courageous, allowing them to easily conquer land. Speaking of land, the Vikings founded what are today Normandy, France and Dublin, Ireland. Today, you can go to the Lofotr Viking Museum to discover more about the Vikings.

Norway has an endless amount of activities for you. You can ski, fish, hike, sail, and even go mountain climbing! The varied landscape allows you to do all of these fun activities. Speaking of landscapes, Norway is very famous for its beautiful fjords. A fjord is a narrow, deep inlet of the sea between high cliffs. The view is spectacular! Some cities to visit include Oslo, Bergen, and Lillehammer. These cities are some of the most amazing in Europe. If you ever wanted to visit Norway, you definitely should.

Norway has some of the most amazing wildlife the world has to offer. These amazing creatures vary from foxes to whales. You can find these exquisite creatures in the vast forests and fjords of Norway. Norway's climate and resources make this a perfect environment for these animals. There are services in Norway (like whale watching) to see Norway's creatures in their natural habitats.

As you can see, Norway has many fun adventures for all. There are ways to explore the past as well as live in the future with Norway's endless list of activities. Who knew a land of ice and snow could contain so many beautiful wilds? From the vast fjords to stunning mountain views, Norway is the perfect getaway spot. If you are bored, visit Norway because you know you want to.

Edgar Allan Poe By Libby F.

Have you ever heard of the famous poet Edgar Allan Poe? He was one of the most famous journalists, short story writers, and poet. He was born in Boston Massachusetts on January 19th, 1809 and died October 7th, 1849. Some of his Famous poems are: Alone, A Dream within a Dream, Song, The City in the Sea, and A Valentine.

In 1845, his best known poem was The Raven. When Edgar was a young boy, he was sent to live with a foster family in Richmond Vermont, the Allans. His name was originally Edgar

Poe, but due to his mother's death on December 8th 1811, and when his father abandoned him, and because spent most of his life with the Allans, he changed his middle name to Allan. When Poe graduated, he went to the army right after he wrote his first book called *Tamerlane and Other Poems*.

As you can see, Edgar Allan Poe is a great poet and author! Learn more about this famous poet at

www.biography.com and

www.Wikipedia.com!

Image taken from www.poets.org

Tom Brady By Allison M.

Do you want to learn about Tom Brady? Well read this!

Tom Brady was born August 3, 1977. He was born in San Mateo, CA. Brady is Polish, Irish, Swedish and Norwegian. Brady plays for the Patriots, he is number 12. His height is 6 ft. 4 inches (1.93m). His weight is 225 lbs (102 kg). Brady went to school in San Mateo, CA and Juniper Serra high school and went to college at Michigan University. He also went to St. Gregory's Elementary School. Brady was also an altar boy. When Brady was in college he played baseball and football. Brady was MVP for Super Bowls 36 and 49! Brady started playing for the Pats in 2000. Brady's roster status says he is active.

Brady won 4 Super Bowls and he has been to 6 Super Bowls! Tom Brady has 3 kids.

To remind you, the Pats won the Super Bowl 49! So now you know about Tom Brady.

Harp Seals By Dylan B.

The harp seal's (or saddleback seal's) scientific name is *Pagophilus Groenlandicus*, which means "ice-lover from Greenland." Its habitat ranges from the North Atlantic Ocean to the Arctic Ocean. An adult harp seal is usually 220 to 320 pounds, and is on average 4 ½ to 6 ½ feet long! That's pretty big! These seals have a long list of food they eat. They eat Polar cod, capelin, herring, halibut, small crabs, and shrimp.

Harp seals live to be about 35 years, if they're lucky enough to survive. People are hunting these defenseless seals for their fur and meat. The saddest part is that 95% of the seals hunted are 3 weeks to 3 months old, because that is when their fur is white and beautiful. If people aren't careful, we could lose the entire species of this seal. WE NEED TO ACT NOW!!! Please write or email the government that you would like this to stop!

Malcom Butler By: Nakul R. and Dylan B.

Who was the Patriots rookie cornerback that made a game-saving interception in this year's Super Bowl that secured victory for the Pats? Answer: Malcolm Butler!

Malcolm Terel Butler was born on March 2nd, 1990 in Vicksburg, Mississippi. He has 4 siblings. In 2009, Butler graduated from Vicksburg High School. He went to Hinds Community College, and had only 22 tackles and 1 interception. Butler was kicked off the team after the 5th game of the season. He worked at Popeye's for a part time job after he got kicked out of school.

He was invited back on the team in 2011. Then, in 2012, Malcolm was enrolled into the University of West Alabama. He specialized in physical education. Next year he was named Beyond Sports Network after making a total of 45 tackles, 2 interceptions, and 1 blocked field goal. That is pretty good for a 2nd year player!

And finally, on May 19th, 2014, Malcolm Butler joined the New England Patriots. In Super Bowl XLIX, he contributed late in the game but it was big! At one point he was covering Seattle Seahawks wide receiver Jermaine Kearse when quarterback Russell Wilson threw a long ball down the sideline to Kearse. Butler tipped the ball but Kearse juggled the ball and made an unbelievable catch. Then, a few plays later, with 20 seconds left in the game Malcolm Butler made a game clinching interception. He came out of nowhere and jumped right in front of Ricardo Locke and fell out of the end zone. That was the game saver. Quarterback Tom Brady was the super bowl MVP or most valuable player and got a truck which he gave to Butler.

Malcolm Butler may not be the best cornerback in the NFL, but he certainly is a game changer!

Endangered Elephants

By: Libby F. and Madison B.

If you want to help save Elephants and learn about them, **READ THIS! IT IS IMPORTANT!**

Elephants are endangered due to poaching and people taking their tusks, (Ivory). Elephants have been endangered for many, many years. Their habitats have been getting destroyed because of people building and settling. Some ways to help: Adopt an Elephant (you don't specifically **OWN** the elephant at your house, you buy or pay for it monthly to live in a wildlife habitat) and Reuse your ivory products. Sure cats can purr, but did you know Elephants can too? Elephants are in a way like humans; they play, laugh and can do many more human

like things! If elephant poaching continues for less than thirty years then they'll be **EXTINCT!** You should help and learn more about these amazing and large land animals! Learn more on www.animalwildlife.com about Elephants!

Image taken from: animals.nationalgeographic.com

The Adorable Red Panda

By Kacey C.

The red panda is commonly mistaken as a bear but is in fact closer related to the raccoon than the giant panda. It was named red because of its coloring and panda because panda means bamboo eater. The red panda lives in the cloud forest of Southern China, Asia. The red panda is about 25 inches tall. It the size of a house cat they weigh in-between seven and fourteen pounds. The red panda is a mix of red and white and they have a red bushy tail they use to keep themselves warm in the cold cloud forests. The red panda in captivity can live up to fourteen years in the wild they live seven to eight years. When a red panda is a year or older the red panda is ready to mate. There is one to four red panda in a litter of red panda. Sadly the red panda is listed on the endangered species list.

They are losing their homes in the cloud forest to deforestation. Luckily the red panda is being helped. The red panda is protected where it lives.

I hope it will make a big amazing comeback. Personally I think the red panda is one cool adorable creature!

The Sacrifice

Story by: Kathleen Benner Duble

By: Lilly O.

Have you ever heard of the book *The Sacrifice* in Salem Witch Trials in Massachusetts? The writer of this book is Abby's great great great great great grand-daughter. And this book is a true story! You might get bored in the beginning and a little bit in the end but the main part of the story or the middle of the story has a lot of suspense and it's a little scary. It is about Salem witch trials and how Abigail Faulkner got accused for being a witch and went to jail and got separated from her family till trial to see if she was a witch or not. In jail there was her and her sister and her aunt. It was a very hard time in jail for Abby she had no fresh clothes and not enough food and drinking water. And when she would go to sleep rats would come in and scatter around the floor. During the trial everyone had very mixed emotions. And I don't want to give away too much but if you want to get this book you could go to your local library or buy it on Amazon.

Image taken from www.goodreads.com

My Little Pony By Ava K.

Have you ever seen a young kid toy become loved by adults? If so, what's the name? If you answered My Little Pony, or MLP, you've guessed one of them!

MLP in the most recent generation are figures with smooth hair. They come in many different sets and some are much different from others. There are also smaller Blind Bag figures. Each comes in different bags with a surprise pony inside. There are also sets that come with a few actual visible main ponies.

Now let's talk MLP generation. There's the first one, or G1. I think this generation is a little unknown. Although there was a quite popular TV show back then. Anyway, then there's G2. These MLP had a bit of a design change. Then, there is G3. They are similar to G2, but they have main characters. The main characters of this series were Pinkie Pie, Rainbow Dash, Cheerilee, Scootaloo, Sweetie Belle, and Star Song. Then there's G3.5, which is a bit the same as G3, but the designs are changed and look a bit cuter. Last but not least, G4. This is the generation that probably brought the most MLP fans. Some of the main characters were switched, but all got brand new designs. The new characters, known as the Mane Six, are Twilight Sparkle, Rainbow Dash, Applejack, Rarity, Fluttershy, and Pinkie Pie. The series still brought back the old characters, just not as main characters, although a couple episodes zoom in on Scootaloo and Sweetie Belle, both former main characters, but as small fillies with their friend Apple Bloom.

This series attracted many male and female fans. The male MLP fans are usually known as Bronies (a mix of Bro and Pony), and the female fans, Pegasisters (mix of Pegasus and Sister). A convention, known as BronyCon, for the older fans of the show, (although younger fans are probably allowed too) is held in a different spot in the U.S.A. each year. In 2015, it will be held in Baltimore, Maryland.

There have been a couple of non-main characters that are very popular. Some are Lyra Heartstrings, Bon Bon, who is Lyra's best friend, Dr. Hooves, (this one is famous because it seems to be related to Doctor Who) And Derpy. In the toys, Derpy's name is replaced with a muffin, because she is famous for her love of them. There has also been lots of hidden references, such as this one: In one of the most recent episodes, a clone of Pinkie makes a face similar to a G3 pony. Another episode had a Wizard of Oz reference, because one of the characters appeared in a big pink bubble like the Good Witch of the North.

Now that you know about the show itself, let's go on to talk about the characters. Each pony in the Mane Six has an Element of Harmony:

Twilight is the ruler, Princess Celestia's student. In the third season, Twilight earns wings, for she previously only had a horn. She is the element of Magic.

Rainbow Dash is a fearless tomboy who loves to bust clouds. But she can be a bit braggy sometimes. She's my favorite pony. She is the element of Loyalty.

Applejack is a hard working pony that helps run a farm. Rainbow Dash and Applejack are constantly challenging each other. She is the element of Honesty.

Rarity is a pure fashion lover. Her sister is Sweetie Belle. She is the element of Generosity.

Fluttershy is a shy animal lover. She is the element of Kindness.

Pinkie Pie is a silly, fun-loving party planner, although she can get really excited sometimes. She is the element of Laughter.

Well, I think this is enough info for everyone reading this. But if you would like to know more, a Wikipedia is a good source of information. Bye, bronzies!

Image taken from: <http://en.wikipedia.org/>
